

Year 7-8 Technology – Digital Technologies Assessment Notification Assessment Task – Digital Design Projects 1 & 2

Term 3-4 20 Weeks

Date Issued:

08/09/2026

Dates of Assessment:

Project 1 – 28/10/2026

Project 2 – 24/11/2026

Term 4 Week 3

Term 4 Week 7

Outcomes to be assessed:

TE4-DES-01 communicates and evaluates design ideas and solutions

TE4-PPM-01 applies processes in the planning, management and production of projects

TE4-DIG-01 demonstrates technological literacy to safely interact in digital environments

TE4-DIG-02 uses data and digital systems to code, design and produce projects

The outcome references are from the NESA syllabus.

Task Description:

Project 1 – *Website Shop*

You will develop a website for a company following a design brief. Additionally, you will make a product to be featured on the website learning about a Technology context as specified by your teacher.

Instructions:

Project 1 - Design Brief

You will create a website for the company '**name here**'. It is a small, family-owned Australian organisation or business that aims to support young designers. The organisation sells handmade products created by school age children who are interested in design. They take a small commission for the product sales and use a portion of the profits to fund design centred education programs in rural areas.

They require you to create a website that includes

- a logo
- a home page
- a shop page

Project 1 submission requirements:

Prepare a visually appealing website using HTML and CSS code that includes all aspects outlined above.

Submit a recording of all pages of the website to the Assignments tab in Google Classroom.
Submit a completed Website Design workbook for Project 1

1. Logo

First you need to design a logo for the company. Consider

- The key characteristics of the company and how this could be best represented visually
- The logo style (emblem, mascot, abstract...)
- A colour scheme
- Applying graphic design principles

2. Skill Development Project

You will create (or identify) a design product from a Technology Learning Area.

You will photograph your product, along with some products made by your classmates to be featured in the shop page of the website. Consider

- Props you would like in the photos
- Product name / description
- Prices

3. Website

Your teacher will provide you with the base code for your website. They will step you through how to modify it to add:

- Your logo
- Add each page (home page, shop page)
- Images to the shop page.

Additionally, you will use the website placemat and provided links to make at least **3 modifications** to your website, such as changing background colours, modifying fonts, adding extra pages, etc.

Student Start-up Instructions

Your Assessment Task Notification (this document) will be posted as an Assignment in Classroom. The Assignment page will show this document with another file called '**Website_Template.zip**'. This is your *starter file*. Follow steps below to copy and prepare starter file:

1. **Download** the starter file '**Website_Template.zip**' from Classroom Assignment to your device.

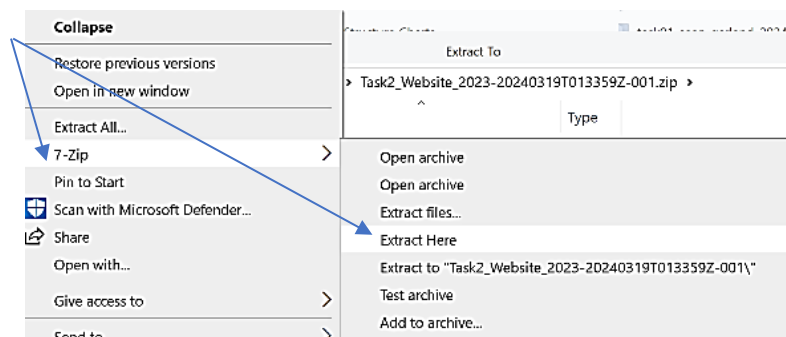

Do NOT open/use the **.zip** file UNTIL you have completed all steps!!

Next step,... Unzip the folder!

Website_
Template.
zip

2. **Right-click** on the **folder** ▼
3. Click, **7-zip** >

4. Click, **Extract Here**.

You will see a new COPY of the folder appear (see right here) but without the ZIPPER.

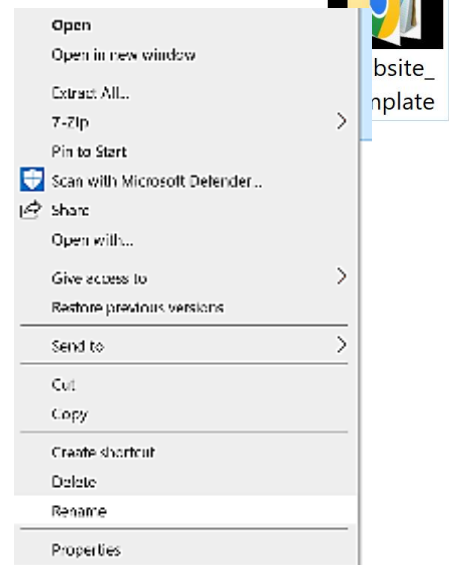

5. Rename the new, unzipped folder ...

6. □ Right-click on folder name (menu right pops up)

□ Click Rename

□ Type new folder name;

{your name}_Website

Task Description continued:

Project 2 – GameIT!

You will develop a digital game using Javascript that promotes the values of Granville Boys High School. You will use the design process to develop your game and document your design development in your workbook.

1. Design Planning in Folio

In your GameIT! workbook you will document your design development including

- A design brief
- Plans for sprites
- A flowchart to show decisions for the game
- An evaluation of your skill development

2. Javascript Game

To develop the code for your game you will use Woofjs and modify one of the 3 tutorials you have used to practice the coding syntax

- Choose one Woofjs tutorial (e.g. monster mash) to modify
- Create your own sprites for characters, enemies, backgrounds in Piskelapp
- Debug your code to ensure it functions the way you planned

Project 2 submission requirements:

Your GameIT! Workbook for Project 2 will be submitted to your teacher for marking AND you will submit the link to your finished game to the assignment in Google Classroom

Marking Rubric - Project 1: Website Shop

<u>We are learning to:</u>					
	<i>I can take it to new places</i>	<i>I can do it well and I know why I can do it</i>	<i>I can do it</i>	<i>I can do part of it</i>	<i>I can remember something</i>
	Outstanding	High	Expected	Basic	Limited
TE4-DES-01	Student demonstrates outstanding knowledge of graphic design principles and completed an outstanding original logo that aligns with the company ethos.	Student demonstrates in depth knowledge of graphic design principles and completed an original logo of high quality that aligns with the company ethos	Student demonstrates knowledge of graphic design principles and completed an original logo of sound quality that aligns with the company ethos	Student demonstrates some knowledge of graphic design principles and completed an original logo that mostly aligns with the company ethos	Student demonstrates partial knowledge of graphic design principles and partially completed an original logo that partially aligns with the company ethos
TE4-PPM-01	Student demonstrates outstanding organisation of the website content, producing appealing product photographs.				
TE4-SAF-01	Student demonstrates an outstanding knowledge of web design and has produced a website of outstanding quality, including more than 4 extension tiles from the website's placemat	Student demonstrates an in-depth knowledge of web design and has produced a website of high quality, including 4 extension tiles from the website's placemat	Student demonstrates knowledge of web design and has produced a website of sound quality, including 3 extension tiles from the website's placemat	Student demonstrates some knowledge of web design and has produced a website, including 2 extension tiles from the website's placemat	Student demonstrates partial knowledge of web design and has produced a partial website, including 1 extension tiles from the website's placemat

<u>We are learning to:</u>					
	<i>I can take it to new places</i>	<i>I can do it well and I know why I can do it</i>	<i>I can do it</i>	<i>I can do part of it</i>	<i>I can remember something</i>
	Outstanding	High	Expected	Basic	Limited
TE4-DES-01	Student has written a detailed design brief that considers who their audience is and which aspects of the school to promote Student has developed more than 3 unique sprites, planned with a good amount of detail in their workbook	Student has written a design brief that considers who their audience is and which aspects of the school to promote Student has developed 2 unique sprites, planned with a good amount of detail in their workbook	Student has written a design brief that considers who their audience is or which aspects of the school to promote Student has developed 1 unique sprites, planned with a good amount of detail in their workbook	Student has attempted to write a design brief Student has developed 1 unique sprites	Student has not attempted to write a design brief Student has not developed a unique sprite
TE4-PPM-01	Student has accurately constructed an algorithm flowchart for their game or part of their game that includes • a start and end • more than one input or output • more than one decision • more than one process	Student has accurately constructed an algorithm flowchart for their game or part of their game that includes • a start and end • one input or output • one decision • one process	Student has accurately constructed an algorithm flowchart for their game or part of their game that includes most of the following • a start and end • one input or output • one decision • one process	Student has attempted to construct an algorithm flowchart for their game or part of their game that includes some of the following • a start and end • one input or output • one decision • one process	Student has not constructed an algorithm flowchart for their game
TE4-DIG-02	Student has developed an outstanding game, confidently using javascript with minimal errors, with more than two original graphics, and more than 3 modifications to improve game play.	Student has developed a game, confidently using javascript with minimal errors, with more than one original graphics, and more than 2 modifications to improve game play.	Student has developed a game using javascript with few errors, with at least one original graphics, and at least one modification to improve game play.	Student has attempted to develop a game using javascript with either one original graphic, or one modification to improve game play.	Student has not attempted to develop a game using javascript
